Education

Ph.D. in Mechanical Engineering *Blacksburg, VA, US*
Virginia Polytechnic Institute and State University (Virginia Tech) *Aug. 2022*
- Advisor: Prof. Kaveh Akbari Hamed
- Dissertation: Collaborative Locomotion of Quadrupedal Robots: From Centralized Predictive Control to Distributed Control

M.S. in Intelligence and Information *Seoul, South Korea*
Seoul National University (SNU) *Mar. 2017*
- Advisor: Prof. Jaeheung Park
- Thesis: Improvement of Humanoid Gait Control using Actuator Deformation Model

B.S. in Mechanical and Aerospace Engineering *Seoul, South Korea*
Seoul National University (SNU) *Mar. 2014*

Appointments

Postdoctoral Research Fellow *Pasadena, CA, US*
California Institute of Technology (Caltech) *Oct. 2022 - now*
- PI: Prof. Aaron Ames
- Department of Mechanical and Civil Engineering

Graduate Research Assistant *Blacksburg, VA, US*
Virginia Polytechnic Institute and State University (Virginia Tech) *Aug. 2017 - Aug. 2022*
- Advisor: Prof. Kaveh Akbari Hamed
- Department of Mechanical Engineering

Graduate Research Assistant *Seoul, South Korea*
Seoul National University (SNU) *Jan. 2014 - July. 2017*
- Advisor: Prof. Jaeheung Park
- Department of Intelligence and Information

Research Interest

My primary areas of interest in academics include robotics, control theory, optimization, dynamical systems, and machine learning. My aim is to improve upon current methods in order to create resilient and intelligent control algorithms for collaborative work. My research covers topics such as decentralized/distributed control for multi-agent systems, autonomous robot control and planning, and agile robots with a focus on safety. My goal is to develop theoretical frameworks and validate them through experiments, with the ultimate objective of creating robust and intelligent controllers for complex hybrid dynamical systems and transferring these to real-world applications, including human-robot interaction, legged locomotion on hybrid robotic systems, and autonomous robots with safety features.

Research Experience

Virginia Polytechnic Institute and State University (Virginia Tech) *Blacksburg, VA, US*
Graduate Research Assistant, Hybrid Dynamic Systems and Robot Locomotion Lab
(HDSRL) *Aug. 2017 - Aug. 2022*
- Development of layered controller for the agile locomotion of collaborative legged robots
- Development of control architecture for the locomotion of collaborative legged robots with manipulators
- Development of hierarchical controller including whole-body controller and trajectory planner for legged robots
- Design of torque-controlled humanoid

Seoul National University (SNU) *Seoul, South Korea*
Graduate Research Assistant, Dynamic Robotic Systems Laboratory (Dyros) *Jan. 2014 - Jul. 2017*
- Development of control algorithms for compensating the hysteresis online for improving the locomotion stability of humanoid
- Development of control architecture for improving the cardiopulmonary resuscitation (CPR) performance with robot manipulator
